

Young EBME Calibration Services

High accuracy and UKAS* accredited ISO 17025 calibrations are available from the Young Calibration Laboratories, using both primary and series transfer calibration methods.

A large range of equipment utilized within the EBME sectors can be routinely and cost effectively calibrated.

Laboratory Calibration Facilities

- Ventilator Testers*
- Spirometers*
- Flowmeters*
- Test Sets and Regulators*
- Infusion Pump Testers
- Burettes

- Gas Monitors
- Syringes
- Tympanic
- Arterial Thermometers
- Standard Thermometers
- Humidity Meters
- Barometric Pressure*

Young Calibration endeavours to provide a total calibration solution to the high demands of EBME Departments and understands the importance of total medical equipment control.

The company invests heavily in high quality reference standards and continues to expand its independent assessment regime under the UKAS accreditation programme.

- Blood Pressure*
- NIBP Testers and Monitors*
- Defibrillators
- Vital Signs
- Pulse Oximeters
- Parameter Testers

All medical equipment calibrated comes with a comprehensive certificate, with statements of uncertainty for each parameter. For singular or contract quotations please feel free to contact us. Young Calibration would also like to hear from any EBME Departments, on current calibration trends, problematic calibration issues and new equipment experiences.
