

Automotive Calibration

Comprehensive service, calibration and technical support for automotive, motorsport and Research & Development establishments, covering engine test beds, rolling roads, climatic chambers and component test rigs. Our field service engineers are available to visit site locations throughout the UK, for test bed and associated test instrument calibration. The company provides an alternative supplier option to the original equipment manufacturer, whether for breakdown response or financial constraints, our engineers have a knowledge base covering all the leading test equipment manufacturers.

Parameters

- On Site Support
- Emergency Call Outs
- Technical Support
- Instrument Sales & Advice

Instruments

- AVL, Froude, CP, TA, Horiba, DSG
- Smoke Meters
- Fuel Meters
- Air Meters
- Blow-by Meters
- Cylinder Pressure
- Speed
- Torque
- Temperature
- Pressure
- Analogue mA, V, Ohms
- Accelerometers
- Out of Hours Working
